

Improved safety and comfort for your horse

Info

Up to 28 % less work

Research has found that soft rubber mat systems with reduced bedding (approx. 1 cm) save time when mucking out. The rubber mat provides softness and insulation, the bedding is only needed to absorb moisture.

(Source: Benz et al., 2013)

Lying down with confidence

In the study, horses spent slightly longer lying on rubber mats with straw pellets than on straw alone. Very soon after the installation of BELMONDO® Trend, they adopted their preferred lying position (lying down with confidence).

BELMONDO®-rubber flooring for horses

Product overview

BELMONDO®-
RUBBER FLOORING is:

Comfortable

Soft and insulating –
pleasant to lie or stand on.

Natural

Horse-friendly surface for the entire stable –
almost like the natural environment.

Quiet

You'll hear the drop in hoofbeat volume –
creating a strikingly pleasant atmosphere.

Economical

Less bedding and less work mean
more time for your horse.

Rubber is what makes us special!

Sustainability

Our raw materials are top quality used tyres which have already taken care of your safety on the roads. Every year, we recycle the rubber from around 8 million used tyres, thus reducing environmental pollution. The rubber used in tyres is very high quality and is the ideal basis for durable, stable and flexible mats.

Expertise

The unique KRAIBURG mixing process creates a high quality rubber compound that retains the key properties of the tyres (stable structure, elasticity, abrasion resistance).

Innovation

We have our own laboratory to continuously monitor the properties of our products. We also have external testing carried out by the DLG to validate our own tests. Many products are also certified by the "Fachstelle für tiergerechte Tierhaltung und Tier-schutz" (Specialist Unit for Animal-Friendly Husbandry and Animal Welfare) for use in Austria (www.tierschutzkonform.at).

Transparency

We are inspected by the DLG to check our continuous product and production quality, based on the worldwide ISO 9001 standard. Every year, we open our doors to comprehensive quality audits of our manufacturing processes. As part of these audits, we passed PAH certification.

Made in Germany

We have been developing and manufacturing rubber flooring for animal husbandry at our Tittmoning site for more than 50 years. With more than 200 employees, we are one of the leading suppliers of stable flooring. KRAIBURG BELMONDO® rubber equestrian flooring is a quality product, made in Germany. As a German manufacturer, we guarantee many years of reliable use from our products and take pride in the excellent reviews we receive from consumer and testing institutions.

Tolerances: thickness: +3/-2 mm; length + width: +/- 1.5 % (DIN ISO 3302-1 tolerance class M4)
The tolerances also apply within the mat and when installed.

The products presented here should only be used for the mentioned applications. Technical specifications are subject to alterations. All sales are subject to our General Terms and Conditions. Legal basis is the German version of the document.
